

## PROTECTASEAL

### PROTECTION AGAINST STAINING

**PROTECTASEAL-S** is a solvent-based premium stain-resistant sealer for natural stone, pavers, tiles, concrete and grout.

- Excellent oil/water-repellency and protection against staining.
- Retains existing surface colour and finish
- Breathable formulation that allows water vapor to escape freely
- Provides protection against efflorescence and salt attack.
- Formulated for both indoor/outdoor application.
- Recommended for both residential and commercial applications.
- Treated surfaces look new longer & cleaning made easier
- Controls mold and mildew growth
- Long lasting protection including commercial cleaning.

**PROTECTASEAL-W** is a water-based environmentally friendly water-based premium stain-resistant sealer for natural stone, pavers, tiles, concrete and grout.

Available in 4 litre and 20 litre containers.

## PROTECTACRETE

**PROTECTACRETE-S** is a solvent-based penetrating water repellent sealer ideal for natural stones, concrete pavers, clay bricks, and unglazed terracotta tiles and grout.

- Permanently bonds to the substrate with no peel or blister.
- Retains existing surface colour and finish.
- UV, alkali stable and durable formulation.
- Breathable formulation that allows water vapor to escape freely.
- Protection against efflorescence and water-borne staining.
- Formulated for both indoor/outdoor application.
- Treated surfaces look new longer & cleaning made easier
- Easy application and cost effective.

**PROTECTACRETE-W** is a water-based environmentally friendly penetrating water repellent sealer ideal for natural stones, concrete pavers, clay bricks, and unglazed terracotta tiles and grout.

Available in 4 litre and 20 litre containers.

## TILE & GROUT SEALER

A highly penetrating water repellent sealer ideal for ceramic and terracotta tiles and grout.

- Permanently bonds to the substrate with no peel or blister.
- Retains existing surface colour and finish.
- UV, alkali stable and durable formulation.
- Breathable formulation that allows water vapor to escape freely.
- Protection against efflorescence and water-borne staining.
- Formulated for both indoor/outdoor application.
- Treated surfaces look new longer & cleaning made easier.
- Ideal for bathrooms and balconies.

Available in 4 litre and 20 litre containers.

## SOLID SILANE 80

Superior protection for engineered concrete structures such as buildings, wharves, and bridges to prevent water and chloride ion induced reinforcement corrosion.

**Solid Silane 80** is also an environmentally friendly sealer.

- Water-based cream containing over 80% active silicones.
- Ability to deeply penetrates into dense concrete.
- Does not splash or run off uncontrollably on overhead and vertical surfaces.
- No pollution of waterways and atmosphere due to no run off and low evaporation.
- Easy quality control by measuring the wet film thickness.
- Permanently bonds to the concrete with no peel or blister.
- Forms UV, alkali stable and durable hydrophobic zone within concrete surface.
- Significantly reduces water penetration and harmful salts such as chloride ions.
- Does not significantly change the surface appearance and vapour permeability.

Available in 20 litre containers.
